

# Docmosis Torando v2.2 Release Notes

Dec 2015

Docmosis core updated from version 4.0.2 to 4.0.3

## ***Tornado Changes***

#	Change
1	GUI improvements for Tornado console: <ul style="list-style-type: none"><li>- Test button is always visible</li><li>- Its now easy to resize the display to make the data area larger to work with</li></ul>
2	Rendering updated to always use “localhost” when invoking the render. This fixes the issue where the server is unable to reach back to itself via the public hostname / address. Two new configuration settings are available to override this configuration: <code>docmosis.tornado.render.useHostName=localhost</code> <code>docmosis.tornado.render.useUrl=http://my.host.com:8080/</code>
3	Added command line settings for control over logging: <ul style="list-style-type: none"><li>- <code>log.level=debug info error</code> to specify the level of logging to the console and log files</li><li>- <code>log4j.config.file=path</code> to set the log4j logging configuration file</li><li>- <code>java.util.logging.config.file=path</code> to set Java Util logging configuration file</li></ul>

## ***Web Service API Changes***

#	Change
1	<no changes>

## ***New Core Engine Features***

#	Change
	<no changes>

## ***Bug Fixes / Technical Changes***

#	Change
1	XML sample data creation no longer creates invalid duplicate keys.
2	Bug fix where template processing errors for conditional sections inside bullet/numbered lists where the conditional section end is in a different paragraph.
